

# Installation Guide

---

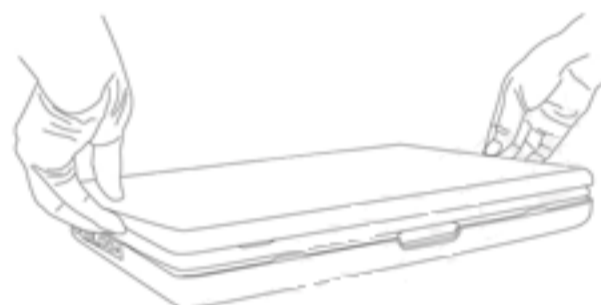

**1**

Place the Techshell on a flat surface. Be sure that both the Techshell and your computer are free of dirt.

**2**

With the front of the computer facing you, place the rear into the shell and slide it backwards towards the back hook.

**3**

Gently push the front of the computer back and down.

**4**

For the top piece, place the lip towards the rear of the computer and bring the front down allowing the tabs to take hold.

**5**

For further help, videos showing both installation and removal of the Techshell are available at:
